

## **Bear Canyon Tree Academy (aka Bear Canyon Tree Farm)**

**Meet Little Tree Bear, Bear Canyon Tree Academy's youngest prodigy. Here he is all dressed up to go shear the Douglas fir. He's so cute – and he asks such great questions that we thought you might enjoy the answers, too!**

Bear Canyon Tree Farm has always been a place of learning, sharing and experimentation. Our founder, Charley Burton, was the first in our state to grow Noble fir for Christmas trees. He was fresh from college at the University of California at Davis (the ag college), so he set out to do everything right. He pioneered many of the techniques that the industry uses today. Now this knowledge, along with his proprietary tree stock, is being passed on to the third generation.

As we teach our third generation all of the different facets of Christmas tree farming, we are struck by the diversity of knowledge required to do the job right. We thought much of this information could also be useful to our customers. Perhaps to better understand how to handle the product when it reaches their marketplace or to assist them in explaining to THEIR customers just what went into providing that fragrant, fresh tree for their home.

Therefore, our own "next generation" is hereby represented by little Tree Bear, a student at "Bear Canyon Tree Academy". He is about to go on field trips and visit our customers while on his quest to learn all there is to know about growing and caring for Christmas trees.
